A Newsletter for Families
May 2022

April was full of excitement and fun adventures for our friends, as they used their creative imaginations as we celebrated The Week of the Young Child. Our students were putting their counting skills to the test, using their thinking abilities, and working as a team throughout the classrooms. Our 3's, 4's and 5's years old enjoyed an in-house field trip with the Evergreen Environmental Recycling for Earth Day.

Welcome May!

During the month of May, we will be blooming, buzzing, and growing as we learn about bugs, the garden, and how plants grow! We are eager to dive into the natural wonders. Be sure to step out back on our patio to watch our garden grow! Our little minds will expand with emergent literacy skills throughout the month with different activities that challenge and strengthen. May wouldn't be complete without celebrating Cinco De Mayo and learning about the Mexican culture.

May 2nd- 6th is Teacher Appreciation Week. We will be celebrating our staff all week long. Help us celebrate our wonderful teachers and staff. We will have posted suggestions of how to say thank you on the Procure app and at the front desk.

Please join us Friday, May 6th at morning drop off for Muffins with Mom! We want to certainly say Happy Mother's Day to all our beautiful and loving mothers! To the world you are a mother, to our Legacy family you are the world! HAPPY MOTHER'S DAY!!!

Don't forget to sign-up for our 2022 Castaway Adventure Summer Camp. Registration is going on now.

Sunday, May 8th

Memorial Day
Monday, May 30th

May Class Themes of the Month

Dreamers ~ Theme: Bees and Buds

Our babies' key experiences will strengthen their sense of self, creative representation, communication, and language. Their joyous rhyme of the month is our old time favorite, Ring Around the Rosie, along with Bringing Home a Baby Bumblebee. Your little ones will experience playtime with hats, one-piece puzzles, and ladybug shapes.

Travelers ~ Theme: Hugs and Bugs

Would your child rather have a hug or a bug? Hidden inside our theme and some of the experiences are words that rhyme to help children with sound discrimination and emergent literacy skills. Gifts for Mother's Day and opportunities to sing about bugs while crafting them using play dough, paper plates, muffin cups, and paper towel rolls will be a big part of the fun.

Adventurers ~ Theme: We Bloom and Grow

As our toddlers grow each day, we note their accomplishments by recording their skills to share with you at our conference. We'll celebrate Mother's Day with murals, charts and art projects. Your children will enjoy putting their own words into the text and making up their own dog names. You are in for a wonderful treat this month without a doubt!

Discoverers ~ Theme: Butterflies and Blossoms

We welcome a new month and new theme while encouraging children to tell what they already know about it. We introduce The Very Hungry Caterpillar and new songs, rhymes, and fingerplays. We make models, divide the children into two small groups and guide them in creating their own hungry caterpillar. Symbols that represent spring will include flowerpot, pinwheel, kite, baby animals, baseball, bubbles, umbrellas, dandelions and, of course, blossoms!

Voyagers ~ Theme: Growing and Going

This month your child will explore alphabet picnics and ways to enhance their own self-images. Children will vote for their five favorite books and begin to feel like "big kids" as they create a Yearbook with a great deal of planning. Their Key Experiences will include, as always, comparisons between numbers, moving to music, discrimination between sounds, and fitting things together in space.

Explorers ~ Theme: Nature Photographers

May brings many experiences relative to flags, literacy, art, and brain "entertainment." The children will make different kinds of flowers and work on crafting a special Mother's Day gift. A photo display of pictures both taken at our center and brought in from home will grace the classroom for additional fun this exciting month.

May

Dreamers

Math- This month children will be exposed to bright and bold patterns and learn about the color green!

Science- Dreamers will use their senses as they explore flowers, and they will work on their pulling and pushing skills.

Social Studies- May's Social Studies Enhanced Learning lessons will expose children to people in job uniforms and they will practice self-recognition and friend recognition.

Travelers

Math- This month the Jr. Toddlers will learn about the diamond shape and build an understanding of the mathematical concept "more".

Science- Toddlers will learn about bees and how they help flowers. They will also get a chance to be a crawling caterpillar and then turn into a flying butterfly as we pretend play our way through the life cycle of a butterfly.

Social Studies- Travelers will work as a team as they become a caterpillar and collect leaves. They will also learn about what classrooms look like in different countries.

Adventurers

Math- This month, Adventurers will measure with non-standard measurement tools. They will also learn about octagons and recognize them in the real world.

Science- Sr. Toddlers will learn about the science behind bubbles and experiment with motion.

Social Studies- Adventurers will learn all about astronauts and construction workers this month. They will participate in pretend play scenarios where they will get to rocket to the moon and build and demolish tall buildings!

Discoverers

Math- Discoverers will become pretend pizza makers as they work on their addition and subtraction skills to add and take away pepperonis on different pizza orders. Discoverers will also continue to work on their pattern making and recognition skills.

Science- 3-year-olds will learn all about what we breathe in and out and will conduct science experiments to discover how carbon dioxide affects liquids.

Social Studies- Discoverers will learn about the Statue of Liberty and what it symbolizes. They will also learn about and create a miniature model of the Grand Canyon.

Voyagers

Math- Voyagers will work on counting by groups of five. They will also begin building an understanding of division as they decide how many slices of pizza each person receives.

Science- 4-year-olds will learn about solids and liquids this month. They will also make their own goo as they learn about things that are in between states of matter.

Social Studies- Voyagers will learn about Mount Rushmore and the famous faces on it. They will also learn about Sacagawea and her contribution to the Corps of Discovery.

Ask your center's management team for more information and for a physical or digital copy of our Summer Camp brochure!

JOIN US FOR A SUMMER CAMP ADVENTURE!

This summer, explorers will embark on an amazing sea adventure. The sailing trip planned takes a turn and they find themselves shipwrecked on Castaway Island. Get ready for a summer of exploring the sea, navigating with the night sky, examining wildlife and landforms, investigating cartography, creating delicious dishes, and much more as we find our way off Castaway Island and back home.

Shape Sort

Supplies

Painter's tape
Collection of toys/objects

Directions

1. Using the painter's tape, create silhouettes of a triangle, a circle, and a square on the floor or table.
2. Take your child on a shape hunt around the house. Ask them to collect as many of these shapes as they can find.
3. Bring your collection of objects back to the shape silhouettes and sort the items by shape.

For younger children, provide the collection of objects and work together to sort by shape. Or tape out and work on one shape at a time.

For older children, help them describe shapes using real math language, like sides and vertices. Extend the activity by adding other shapes, including 3D shapes. Or count the number of items in each category, graph, and compare.
